Luca Luis Gustavo Pohl-Angel

AI & Full-Stack Developer

I build web applications and AI-assisted development workflows, from responsive interfaces and API integrations to agent tooling and deployment. My projects combine React and TypeScript with Node.js, Python and practical Linux workflows. I care about visual design, reliable behavior and making tools useful. My background includes IT support and four semesters of Cyber Security Management.

DEVELOPMENT SKILLS

Web & interfaces	React, TypeScript, Next.js, Tailwind CSS, Vite; responsive UI and visual design.
Backend & data	Node.js, REST APIs, JSON and Python scripting; hands-on exposure to Supabase, PostgreSQL and SQLite.
AI & workflows	AI provider integrations, agent workflows and reusable skills; Hermes Agent, Codex, OpenAI / OpenRouter APIs; n8n automation.
Delivery & tooling	Git / GitHub, Linux (Garuda / Arch), Docker, Nginx, SSL and SSH.

SELECTED DEVELOPMENT PROJECTS

PHASE Own project · private development version

- Developed a responsive esports website with Astro, TypeScript and Tailwind CSS, including tournament discovery interfaces.
- Implemented interactive sections, GSAP motion and layered mascot artwork across the website.

Atlas·OS Own project · atlas-os.dev

- Designed and published a TypeScript / Node.js CLI for AI-assisted development workflows, integrating AI providers including OpenAI and OpenRouter.
- Built the companion React / TypeScript website with component-based layouts, navigation and GSAP motion.

Vestigium Own project · development version

- Created a context-led design skill for coding agents, covering frontend creation, refinement and review.
- Developed guidance for art direction, layered assets and optional motion, with installation support for multiple coding agents.

PREVIOUS EXPERIENCE

IT rollout & onsite support J.J. IT Solutions · 2023

Assignments at Primark and Heinz Company: workstation setup, Active Directory accounts following documented procedures, monitor installation and printer connections.

EDUCATION

Cyber Security Management	Hochschule Niederrhein · four semesters completed; networking, operating systems and IT security foundations.
